WHEAT—**CHICAGO**, March 9.—There was a dip in prices early, which caused a reaction. The market closed at a profit, but it was sold last week. The resulting advances have about level selling, part of which was due to local orders. There was no change in the price of hard winter wheat, but there was enough in the declines to close prices not far from their final figure of Saturday. The trade was uneven; some buyers were active, but the market was irregular and hard to follow.
